

CSE 115 - Project

Programming language I (C programming Language)

Project Title: Mess Management System.

Project Contents:

The main purpose of this project is making a mess manager life easier in managing mess. It provides many options. Here, below we describe that.

After opening the program for the first time, the user will be prompted to register his password. Then, he/she will be able to start the program. At first, 3 options will arrive on the main window: "Mess management", "Member management" and "EXIT".

Mess management will give you 9 options. Members Money Info, Edit mess estimated bill, Add Mess Expenses, See Mess Expenses, change password, reset program, Go to Member management Section., return to the Main menu, and EXIT The software. The member management section will take you to the member management part.

Member management will give you six options. See

Member Info, Edit Member Info, add new Member, Remove Member, return to main

Menu, EXIT The software. Clicking on an option will bring you to another screen where you will be able to enter the required information.

And Exit to exit the software.

Here, I am using *.dat* file and *.txt* file to save data.

If you have any suggestions for my project, please don't hesitate to contact me.
